

Vacation-rental marketplace - production architecture

Scaling strategy for frontend, backend, storage, search and deployment. Prepared for the Airbnb listing-page clone (MERN) by Rishi Detroja.

Solid arrows: synchronous request path. Dashed orange: asynchronous events (index updates, cache invalidation, CDC). The CDN pulls media from S3 and caches HTML from the web app.
Colours: pink = domain services, blue = data stores, grey = platform / edge, orange = messaging, green = scaling notes.
